1 Nature of the tasks:

DG Maritime Affairs and Fisheries (DG MARE) aims to develop the potential of the European maritime economy and to secure sustainable fisheries, a stable supply of seafood, healthy seas and prosperous coastal communities – for today's Europeans and for future generations. This involves formulating, developing and implementing the Common Fisheries Policy – the cornerstone of our actions for a sustainable exploitation of fisheries resources; and promoting an integrated approach to all maritime policies. The DG has around 300 staff, distributed over 5 Directorates and 20 Units.

The wide variety of responsibilities creates an interesting and challenging working environment. Hierarchical circuits are short, and working efforts translate into tangible results with a direct impact on the ground and on stakeholders.

Unit D3 is responsible for coordination and development of the Common Fisheries Policy (CFP) and its main structural support instrument, the European Maritime and Fisheries Fund (EMFF). It is responsible for developing legislative proposals for both the CFP and any structural support instruments. - Providing expertise on the analysis of joint recommendations by Member States under the CFP, in particular related to the landing obligation, discard plans, technical measures and multi-annual management plans.
- Monitoring and coordinating the implementation of the Technical Measures Regulation, including the preparation of any reports and secondary legislation,
- Contributing through technical expertise to the development and follow-up of proposals through the inter-institutional decision-making process,
- Assisting the Commission and its departments in meetings held and work carried out within the Council of the European Union, the European Parliament and other institutions, Advisory Councils and external bodies.
- Providing technical expertise to DG MARE colleagues working on policy proposals and reports in the area of expertise.
